WELCOME ABOARD!

Welcome aboard the R.M.S "Titanic" on the occasion of its maiden voyage. The TITANIC takes into a new luxurious class many unique features pioneered by its sister ship. "THE OLYMPIC", which was launched some months ago.

The " TITANIC" caters not only for 1st and 2nd Class passengers, but also 3rd Class, the latter accommodation being equal to 1st Class on most other vessels.

Launched on 31st May 1911, "TITANIC" overall length is 882 feet 9 inches, with a massive weight of 44,000 tons, and a top speeds of around 21 and a half knots.

We of the White Star Line like to think of the "TITANIC" as a symbol of man's achievements in transportation, technology and ship-building. Indeed, she is a floating mansion, rivalling many of the great palaces of Europe. This fine ocean line and women who designed and built her.

Ladies and Gentlemen, feel privileged to be on board sailing with us on the biggest and most luxurious steamship afloat, on which you will wine and dine yourselves in history.

Bon voyage
